SUMMARY

Software engineer with a strong backend engineering background, currently building enterprise-grade systems in Go and Apache Kafka at PT Bank CIMB Niaga. Experienced across the full software development lifecycle, from system design and development to testing, deployment, and production support. Proven track record of delivering scalable and impactful solutions across enterprise systems, AI-driven applications, and full-stack development through experience in both corporate and project-based environments.

EDUCATION

Universitas Indonesia — Aug 2021 – Sep 2025

Bachelor's Degree in Information Systems, Faculty of Computer Science

- GPA: 3.55
- Notable Courses: Data Structures & Algorithms, Database Systems, Interaction Design, Statistics & Probability, Enterprise Application Architecture & Programming, Artificial Intelligence & Fundamentals of Data Science, Information Technology Project Management

WORK EXPERIENCE

PT Bank CIMB Niaga Tbk — Oct 2025 – Now

Software Engineer

- Engineered SIJ, a national tax collection system serving CIMB and Direktorat Jenderal Pajak, by building two independently deployable Go microservices (API and Consumer) with a Kafka event streaming pipeline consuming three topics, designed to handle 50,000+ transactions/hour as one of three core engineers collaborating with 10+ cross-functional stakeholders.
- Managed end-to-end SDLC for internal tool support from development to deployment using Go, Java, Kafka, Flink, Jenkins, Kubernetes, and Openshift.

PT Mid Solusi Nusantara (Mekari) — Mar 2025 – Apr 2025

Solution Engineer Intern

- Co-developed an application that migrated ClickUp to Mekari Officeless, primarily on Javascript, enabling automation of key processes and contributing to a projected 50%+ budget reduction, as scoped by the product team through improved internal tool alignment.
- Originated the idea to redevelop 9+ core features of the ClickUp migration application in Mekari Officeless by identifying structural inefficiencies, envisioning a more scalable system architecture, and crafting the foundational technical documentation to drive product re-alignment.

PT Telekomunikasi Selular (Telkomsel) — Sep 2024 – Dec 2024

Artificial Intelligence Exploration Intern

- Explored Telkomsel AI agents' capabilities using stress testing up to 500 consecutive prompts to evaluate response stability and contributed to the development of a 10-section prompting guideline adopted 100% by Telkomsel for its virtual agents.
- Discovered and implemented a responsive behavior mechanism in an independently built AI agent, adopted across other Telkomsel AI agents to enhance performance consistency and efficiency by up to 40%.
- Conducted comprehensive testing on the MyEnterprise platform using Selenium, executing 50 test cases and identifying 10 bugs to ensure optimal performance and reliability.

PT Telekomunikasi Selular (Telkomsel) — Jun 2024 – Jul 2024

IT Enterprise Assisted In-Sales Intern

- Optimized a generative B2B AI chatbot, Ted, for account managers by automating test flows using Selenium and NLP models, achieving an average accuracy improvement of 15% by integrating feedback from 3900+ use cases.
- Deployed automation workflows to enhance the lead verification process using Selenium and sentiment polarity, reducing manual effort and boosting productivity by over 25% through streamlined data validation and error detection mechanisms.

- Developed an automation program leveraging data-driven insights to elevate Telkomsel's market visibility among key stakeholders by over 10%, strengthening strategic positioning for B2B tender opportunities through targeted analytics and reporting.

PROJECTS

PT Aludra Solusi Indonesia

Aludra Impact, Fullstack Engineer

- Sole engineer in a 2-person team, delivering a production-grade marketing and content platform for an Indonesian environmental solutions company across 3 product verticals with 7 pages, 50+ components, and 4 content modules with full CRUD editors.
- Stack: Next.js, React, TypeScript, Tailwind CSS, Supabase, Vercel

PT Pundi Mitra Mandiri

SIWADI, System Analyst

- Deliver analyzed system requirements to ensure the delivery rate of the information system development by at least 80%.
- Develop an information system for a paint distributor warehouse with 22 PBIs and 13 main features, designed to increase the business process efficiency rate by more than 20%.
- Stack: Next.js, React, TypeScript, Tailwind CSS, Vercel, Google Cloud Platform, Draw.io

Team Bunglon

Phantom Striker, Game Developer

- Designed and implemented core game mechanics, including character movement, strike actions, diverse platform types, and interactive elements, enhancing gameplay engagement and achieving an 83% satisfaction rate at a public exhibition.
- Stack: Godot, GDScript

CERTIFICATION

- AWS Certified AI Practitioner; Issued by Amazon Web Services (October 2024)

SKILLS

- Languages: Indonesian (Native), English (Intermediate)
- Tools & Technologies: Go, Java, Kafka, Flink, Jenkins, Kubernetes, Openshift, Python, Next, React, Postman, PostgreSQL, Docker, Supabase, Vercel, Javascript, Spring Boot, Odoo, Figma, Django, Flutter, Dart, Godot, GDScript, Tableau
